Best Friends Forever

The dog has been man's best friend for over 14,000 years. Scientists know that man and dogs have had a relationship for many years through their study of cave drawings, early pottery, and Asian ivory carvings.

70% of people sign their pet's name on greeting and holiday cards. 58% include their pets in family and holiday portraits.

Different Breeds

Dogs vary greatly from breed to breed yet they are identical in anatomy with 321 bones and 42 permanent teeth. The smallest breed is the Chihuahua, 4 pounds and 5 inches high. The tallest breed is the Irish wolfhound, which is 39 inches tall. The St. Bernard is the heaviest dog; it can weigh about 200 pounds. The Chow Chow and the Chinese Shar-Pei have blue-black tongues.

More than 500 breeds of dogs exist worldwide. About 50 million dogs live in the United States. The American Kennel Club recognizes 148 breeds.

A 20% gratuity will be added to packs of 6 dogs or more.

Of course, dogs can stay over for \$25 per night

Dogs get 50% off the Woof Menu & their people get cocktails at half price from 5-7pm

ARF

c/o Hotels is for Dogs. Dogs are welcome to all of our hotels and have their own menu at The Living Room restaurants. Not all animals have the privilege to be mollycoddled, as they should. So the Animal Rescue Fund has taken on the responsibility of finding lovely homes for those lacking affection. The animal welfare organization in the Hamptons is spread over 22 acres, featuring an extensive outdoor play area, indoor dog runs and a medical wing. The ARF is entirely funded by private donations. We donated most furniture from the old Maidstone Arms Inn to the ARF thrift shop!

Gunther IV

Gunther IV is considered the world's richest dog. His dad, Gunther III, was bequeathed a \$124 million trust in 1992 when their owner, Countess Karlotta Lieberstein passed away. Since inheriting his former mistress' millions, Gunther III has passed on his fortune and legacy to his son Gunther IV. The German Shepherd has successfully bid on Madonna's old Miami mansion and a rare white truffle. For the latter, Gunther himself attended the auction accompanied by two handlers. There are reports however, that Gunther may be a hoax.

Presidential Dogs

U.S. Presidents Richard Nixon and Harry S. Truman both had Cocker Spaniels. President Lyndon Johnson had two Beagles named Him and Her. President Barack Obama has a Portuguese water dog named Bo.

Krypto the Superdog

Krypto, also known as Krypto the Superdog, is Superman's pet dog in the various Superman comic books. Krypto's first appearance was in a Superboy story in Adventure Comics #210 in March 1955. Although Krypto's breed is never specifically stated in the comic books, he is modeled after a white Labrador Retriever.

As explained in his first appearance, Krypto was originally the toddler Kal-El's dog while they were on Krypton. Krypto as a test subject in a rocket, which was knocked off-course & drifted through space for years until it eventually landed on Earth, where Krypto was reunited with Superboy. Due to the environment (Earth's yellow sun and lower gravity), Krypto possessed the same powers and abilities as his master, although proportionate to his smaller size & species. Certain sensory abilities of Krypto's (senses of smell & hearing) would be more acute than those of Superman, just as an ordinary dog's senses would be more acute than those of an ordinary human. Krypto also had super-canine intelligence; expressed in thought balloons indicating what Krypto was thinking.
